

First-aid Training (Part-3)

First-aid on suffocation, burns, electric shock, animal & insect bites, poisoning etc.

Combined Index

(An '*' sign has been placed alongside important points)

Chapter 1

Introduction to respiratory system and asphyxia (Suffocation)

Index

(An '*' sign has been placed alongside important points)

* Problems associated with the respiratory tract	13
* Chest getting subjected to pressure	14
4. Symptoms of asphyxia	15
5. General first-aid for asphyxia patient	16
6. First-aid to an individual asphyxiated due to a foreign object in the respiratory tract	17
6A. Patients above the age of 7 years	17
6B. For a patient in the age group of 1 to 7 years	23
6C. For an infant (below 1 year) patient	24
7. First-aid to be given to an individual suffocated by drowning	28
7A. Symptoms of suffocation by drowning	28
7B. First-aid	28
8. First-aid to a patient suffocated due to strangulation	29
9. First-aid to a victim of gas poisoning	30
10. First-aid for breathlessness due to asthma	31
11. First-aid to an individual affected by tear gas	31

Chapter 2 Burns and scalds

Index

1. Definition	33
2. Two methods of classification of burns based on their severity	33
3. Objectives of first-aid	36

4. Steps required when an individual's clothes are on fire	36
5. General instructions on first-aid required for burns	37
6. First-aid for superficial burns	38
7. First-aid required for a patient with deep burns	38
8. First-aid for chemical burns	40
9. First-aid for flash burns	43
10. First-aid for sunburns	43

Chapter 3

Electric shock and strike of lightning

Index

1. Electric shock	45
1A. Harmful effects of electric shock	45
1B. Types of electric shocks and the associated first-aid	46
1B 1. A low voltage electric shock	46
1B 2. A high intensity electric shock	47
2. Strike of lightning	48
2A. First-aid	48
2B. Precautionary measures	48

Chapter 4

Illnesses due to changes in body temperature

Index

1. Types of thermometers	52
2. Recording temperature at locations in the human body and methods of recording	52
2A. Oral 2B. Armpit	53
3. Fever and first-aid for it	54
4. Heat exhaustion and the associated first-aid	55
5. Heat stroke and the associated first-aid	56
6. Frostbite and the associated first-aid	57
7. Fall in body temperature below normal (hypothermia) and the associated first-aid	58

Chapter 5

Animal and insect bites

Index

1. Snake bite	62
1A. General information	62
1B. General symptoms	62
1C. Guide to first-aid based on the 'National Snakebite Management Protocol'	63
1D. First-aid	63
1E. Don'ts	64

2. Scorpion bite	65
2A. Symptoms	65
2B. First-aid	66
3. Leech bite	67
4. Bite of a dog or any other warm-blooded animal	67
4A. General information	67
4B. How to identify a rabid dog ?	68
4C. First-aid	68
5. Insect bites	69
5A. Symptoms	69
5B. First-aid	69

Chapter 6 Poisons and poisoning

Index

1. What is poison ?	71
2. Types of poisons	71
3. Symptoms of poisoning	71
4. General first-aid for all types of poisoning	72
5. Poisoning due to some toxins and the associated first-aid	73
6. Precautions required to prevent poisoning	75

Chapter 7

Road accidents

Index

1. Importance of immediate first-aid during road accidents	77
2. Some points on Police inquiry	77
3. General precautions required by the first-aider	78
4. Caution required by the first-aider with regard to the vehicles involved in the accident	78
5. How to remove the helmet of a victim who has met with an accident on a 2-wheeler ?	60
6. Precautions required while removing victim's clothes	82
7. First-aid	82

Chapter 8

Some methods of shifting a victim

Index

1. Aspects to be considered before shifting a victim	85
2. Shifting the victim without help	86
2A. The human crutch	86
2B. Drag method 2C. Cradle method	87
2D. Piggyback method	88
2E. Fireman's lift and carry method	89
3. Methods useful when there are two individuals to shift a victim	91

3A. Four-handed	3B. Fore and aft carry	91
3C. Chair support		94
4. Stretcher		94
4A. Method of placing the victim on a stretcher		95
4B. How to carry a victim on a stretcher ?		99
4C. How to place a stretcher carrying a victim on the floor ?		101
5. Precautions required while shifting the victim after first-aid		101

Preface

Generally speaking, first-aid is the help provided to a sick or injured person until full medical treatment is available. Taking into consideration the present day hectic lifestyle, coming World War III, natural calamities, riots etc., it has become imperative for every prudent citizen to get trained in first-aid more as a duty towards the Society and the Nation. It is the realisation of this need that has prompted us to publish this text series (in 3 Parts).

This text elaborates on the first-aid to be provided in the events of suffocation, burning, electric shock, disorders arising due to change in body temperature, poisoning, road accidents etc. In the chapter on 'Animal bites and insect bites' in this part, while explaining the treatment on snakebites, information is provided according to 'National Snakebite Management Protocol' of the Indian Government. Also, while explaining the first-aid treatment on animal bites, 'National Guidelines for Management of Animal bites' of the Indian Government has been referenced.

We pray at the Holy feet of Shri Guru that after reading the text series on First-aid Training and receiving first-aid training, may every prudent citizen become a good first-aider. -
