3. How many calories are supplied by common food items ?	14
4. Which factors affect one's food requirements ?	15
5. How many calories and proteins do children and adults normally require ?	16
6. How does one's activity affect the caloric and protein requirements of one's body ?	16
7. What are the manifestations of deficiency in calories ?	17
8. What are the manifestations of taking food, i.e. calories in excess ?	18
9. How is it that some people eat a lot and yet are thin, whereas others may eat very little and yet gain weight ?	18
Chapter 2 : Proteins	19
1. What are the functions of proteins ?	19
2. What are the sources of proteins ?	20
3. Why are animal proteins rated as first class proteins and vegetable proteins as second class proteins ?	20
4. Can vegetable proteins replace animal proteins	21
5. What are the symptoms of protein deficiency ?	21
6. Is it risky to consume proteins in excess ?	21

Modern perspective on appropriate Diet	9
Chapter 3 : Fats	23
1. Components of fats	23
2. What are the dietary sources of fat ?	24
3. What are essential fatty acids ?	25
4. What are the symptoms of fat deficiency ?	25
5. What are the symptoms of excessive intake of fat ?	26
Chapter 4 : Carbohydrates	27
1. Types of carbohydrates	27
2. What are the functions of carbohydrates ?	29
Chapter 5 : Minerals	30
1. What are the types, functions of minerals and diseases due to their deficiency ?	30
2. Salt (Lavan)	33
3. Caustic salts (Ksharas)	33
Chapter 6 : Vitamins	37
1. Effects of medicines	37
2. Requirement of vitamins and their effects after taking in less or more quantity	38
3. Types of vitamins their functions, diseases and treatment	39
Chapter 7 : Water	51
1. What are the functions of water ?	51
2. Types of water and property	51
3. Testing water	53
4. Purification of water	53
5. How much water should one drink daily ?	54
6. Who should drink less water ?	55
7. What are the symptoms of drinking excessive water ?	55
8. What are the symptoms of water deficiency in the body ?	56

9. Cold and warm water	10. Boiling of water	56
11. Who should drink water which is cooled after boiling		58
Chapter 8. Balanced diet		59
1. What is good nutrition ?		59
2. Principles for calculating calories in the diet		59
3. Food exchanges	4. Principles for selecting a Diet	60
5. Outline of food exchanges	6. Having a proper budget	65
7. Useful tips in the kitchen		66

SECTION 2

Diseases related to diet

Chapter 9 : Diet and diseases		69
1. Not following the dictates of one's own conscience		69
2. Deviating from natural food items		70
3. Pesticides	4. Hormones	70
5. Salt	6. Sugar	70
7. Tea and coffee	8. Chemical preservatives	71
9. Tasty dishes	10. Juices	71
11. Artificial flavours and colours		72
12. Refrigerated food	13. Tonics	72
Chapter 10 : Indigestion		73
1. Causes of indigestion	2. Manifestations of indigestion	73
3. Types of indigestion	4. Medicines useful in indigestion	74
5. Treatment of indigestion caused by specific food items		76
6. Vishtabdha ajirna - indigestion caused by Vata humour		77
7. Vishtabdha ajirna - indigestion caused by Pitta humour		80

Modern perspective on appropriate Diet	11
8. Ama ajirna - indigestion caused by Kapha humour	81

10. What is the role of exercise in controlling weight ?	98
11. Is surgery of any use in reducing body weight ?	98
Chapter 13 : Emaciation and malnutrition	99
1. Causes	99
2. Mild to moderate malnutrition and marasmus	99
3. Protein energy malnutrition - kwashiorkor	100
4. Complications	5. Treatment
	101
6. Ayurvedic concept	7. Aetiology
	101
8. Clinical manifestations	102
9. Associated illness or complications	103
10. Treatment	103

Preface

Hindu Dharma considers food to be Divine. 'आहियते अन्ननलिकादिभिः इति आहारः ।', meaning, whatever goes to the stomach through the food pipe, etc. is known as 'diet'. To help the body function properly, 'diet' is a very important aspect.

Every medical science looks at 'diet' from a different perspective. In the first 3 Texts of this series, we understood the perspective of Ayurveda on diet and partial points from the perspective of modern medical science.

In this fourth part of the series, we will obtain information on the detailed analysis of 'diet' and some related diseases. To obtain complete information on 'diet', please read all the 4 Volumes in this series.

Detailed information is provided on the analysis according to modern medical science on the constituents of the body and diet, such as the proportion and function of proteins, fats, carbohydrates, vitamins, minerals and water. Details have also been provided on the harmful effects of consuming too much or too less of these items, what a balanced diet is and in what proportion should we consume it.

Information in this Text will not only be useful for Vaidyas, Doctors and students, but also for every individual. Bhagawan Vishnu is the Deity of nutrients in the diet.

We earnestly pray at the Holy feet of Bhagawan Vishnu - 'May everyone get good quality food and progress physically, psychologically and spiritually and experience the taste and happiness of Divine nutrients in food'.
